AUTHOR INDEX

Adamczyk, B. 187
Adams, N.G. 193
Adduci, D. 281
Alexander, A.J. 211
Aoki, E. 55
Attina, M. 263

Bart Emary, W. 97
Bierbaum, V.M. 295
Bouchoux, G. 197
Bowie, J.H. 295
Boyd, R.K. 211
Brenna, J.T. 151
Budzikiewicz, H. 119
Bütfering, L. 139

Cacace, F. 263
Callahan, J.H. 9
Carrigan, K.E. 295
Colton, R.J. 9
Conzemius, R.J. 85, 281
Cooks, R.G. 71
Creasy, W.R. 151

Dąbek, J. 187
De Petris, G. 263
Depuy, C.H. 295

Flesch, G.D. 1
Freeman, C.G. 241
Futrell, J.H. 39

Graham Cooks, R. 97
Grandinetti, F. 263

Hand, O.W. 97
Harland, P.W. 193
Hayakawa, S. 251
Hoppilliard, Y. 197
Houk, R.S. 85, 281
Huang, L.-Q. 85, 281

Junk, G.A. 85, 281

Kenttamaa, H.I. 71
Kuwabara, H. 55

Lattimer, R.P. 119

Maclagan, R.G.A. 193
McEwan, M.J. 241
Michner, P. 131
Meot-Ner, M. 241
Münster, H. 119

O'Hair, R.A.J. 295

Petrie, S.A.H. 241

Robson, R.E. 167
Röllgen, F.W. 139
Ross, M.M. 9

Schey, K.L. 71
Schmelzeisen-Redeker, G. 139
Sharp, T.R. 39
Simpson, R.W. 193
Smith, D. 193
Svec, H.J. 1

Tortajada, J. 197
Tsuchiya, M. 55

Winger, B.E. 97
Wollnik, H. 131
Wysocki, V.H. 71

INTERNATIONAL JOURNAL OF MASS SPECTROMETRY AND ION PROCESSES, VOLUME 90 (1989)

SUBJECT INDEX

acetone oxime
  gas phase chemistry of nitrogen containing negative ions: deprotonated nitromethane, —, and acetone oxime *o*-methyl ether, 295
acetone oxime *o*-methyl ether
  gas phase chemistry of nitrogen containing negative ions: deprotonated nitromethane, acetone oxime, and —, 295
alkali halide cluster ions
  high-pressure fast-atom bombardment mass spectrometry: collisional stabilization and reactions of —, 9
alkyl azide
  gas phase protonation of alkyl and phenyl azides, 263
apodization
  experimental evaluation of — functions for quantitative Fourier transform mass spectrometry, 151

$[CH_2{=}CHOH]^{+\cdot}$
  structure and role of ion/molecule complexes during the McLafferty rearrangement: ab initio studies of the system —/$CH_2{=}CH_2$, 197
$CH_2{=}CH_2$
  structure and role of ion/molecule complexes during the McLafferty rearrangement: ab initio studies of the system $[CH_2{=}CHOH]^{+\cdot}$/—, 197
cluster ions
  on the nature of the — from concentrated sulfuric acid produced by fast atom bombardment, 39
$C_2N_2^+$
  the proton affinity of cyanogen and ion/molecule reactions of —, 241
collisional stabilization
  high-pressure fast-atom bombardment mass spectrometry: — and reactions of alkali halide cluster ions, 9
concentrated sulfuric acid
  on the nature of the cluster ions from — produced by fast atom bombardment, 39
cyanogen
  the proton affinity of — and ion/molecule reactions of $C_2N_2^+$, 241

depth profiling
  — of multilayered samples and comparisons of secondary ion and laser desorption mass spectra in the same instrument, 97
desolvation
  — of ions and molecules in thermospray mass spectrometry, 139

fast atom bombardment
  on the nature of the cluster ions from concentrated sulfuric acid produced by —, 39
field ionization masspectrometry
  clusters of water under atmospheric pressure studies by field ionization and liquid ionization mass spectrometry, 55

germane
  characterization of neutral species observed in the electron bombardment of methane, silane and —, 1

H_2^+
  dissociative neutralization of — and HD^+ ions by electron transfer from alkali metals using a negative ion detection method, 251
HD^+
  dissociative neutralization of H_2^+ and — ions by electron transfer from alkali metals using a negative ion detection method, 251
HeB^+
  theoretical calculation of the — molecular ion interaction potential and the mobility of B^+ ions in helium, 193
helium
  theoretical calculation of the HeB^+ molecular ion interaction potential and the mobility of B^+ ions in —, 193
high-pressure fast-atom bombardment
  — mass spectrometry: collisional stabilization and reactions of alkali halide cluster ions, 9

ion association
  — by time-of-flight mass spectrometry, 85
ion swarms
  mean energies of — drifting and diffusing through neutral gases, 167

leucine enkephalin
experimental investigations of factors controlling the collision induced dissociation spectra of peptide ions in a tandem hybrid mass spectrometer. I. —, 211
LiF
the application of the pencil thermoemission ion source for determination of the isotopic ratio Li : Li in a monocrystalline — sample, 187
liquid ionization mass spectrometry
clusters of water under atmospheric pressure studies by field ionization and —, 55
low-energy collisional activation
— of polyatomic ions with different target gases, 71
low ion current pulses
an instrument control and data acquisition system for time-of-flight measurements of —, 281

McLafferty rearrangement
stucture and role of ion/molecule complexes during the —: ab initio studies of the system $[CH_2{=}CHOH]^{+\cdot}/CH_2{=}CH_2$, 197
methane
characterization of neutral species observed in the electron bombardment of —, silane and germane, 1

neutral gases
mean energies of ion swarms drifting and diffusing through —, 167
neutral species
characterization of — observed in the electron bombardment of methane, silane and germane, 1
nitromethane
gas phase chemistry of nitrogen containing negative ions: deprotonated —, acetone oxime, and acetone oxime *o*-methyl ether, 295

peptide ions
experimental investigations of factors controlling the collision induced dissociation spectra of — in a tandem hybrid mass spectrometer. I. Leucine enkephalin, 211
phenyl azides
gas phase protonation of alkyl and —, 263
polyatomic ions
low-energy collisional activation of — with different target gases, 71
polyglycols
tandem mass spectrometry of —, 119

silane
characterization of neutral species observed in the electron bombardment of methane, — and germane, 1
surface coils
— in a mass spectrometer magnet, 131

time-of-flight mass spectrometry
ion association by —, 85
